English — fluent

Product Engineering

Workflow Design
Information Architecture
Responsive UX
Conversion Journeys

Front-end Architecture

TypeScript
React
Next.js
Shared Packages
Config-driven UI
Monorepos

API & Data Orchestration

REST APIs
OData
GraphQL
SWR
Type-safe Contracts
Failure States

Performance & Accessibility

Semantic HTML
Accessibility
Web Performance
Progressive Loading
Payload Control
Responsive Delivery

Reliability & Quality

Playwright
Vitest
React Testing Library
Error Handling
CI/CD
Build Validation

Content & Delivery Systems

Strapi
PostgreSQL
React PDF
React Email
Stripe
Docker
NGINX

PROFESSIONAL STATEMENT

Front-end Engineer with commercial experience across enterprise ERP, finance, payroll and HR software, alongside e-commerce, healthcare and real-estate products. I turn complex workflows and domain rules into reliable, accessible interfaces, then build the shared systems that keep them consistent at scale.

I work beyond individual screens: designing shared component packages, config-driven forms and data tables, Strapi content models, REST and GraphQL integrations, PDF reports, transactional email templates and automated test coverage. Recent work spans a 35-app enterprise monorepo and an independently developed multi-application marketplace.

My background in graphic design brings strong product judgement to information hierarchy, responsive behaviour and interaction details. I favour pragmatic architecture, explicit types and reusable patterns that help teams ship confidently and maintain products over time.

RELEVANT EXPERIENCE

Front-end Engineer, Lobasoft

Mar 2024 – Present · Hybrid

Building and modernising a 35-application enterprise platform spanning ERP, financials, payroll, HR and audit. Develop shared TypeScript packages and config-driven form/list architecture; deliver PDF reporting, React Email notifications, document upload and signing workflows; and improve accessibility, error handling and automated coverage.

Front-end Developer, Ideafarmus

Nov 2021 – Mar 2024 · Vilnius

Delivered customer-facing websites, bespoke e-commerce applications and CMS, ERP and CRM interfaces. Built reusable TypeScript and React systems, modelled content in Strapi, integrated REST and GraphQL services, and shipped multilingual lead-generation, checkout, PDF catalogue and transactional-email workflows.

SELECTED PROJECTS

Lobasoft Enterprise Platform

Private commercial platform
